

## **The ISGI WWW homepage**

Josette Paris and Michel Menvielle

CETP, 4 Avenue de Neptune, F-94107 Saint Maur des Fossés, France, josette.paris@cetp.ipsl.fr -  
michel.menvielle@cetp.ipsl.fr

The ISGI Publication Office WWW homepage: <http://www.cetp.ipsl.fr/~isgi/homepag1.htm> aims at providing simple and efficient access to geomagnetic indices, either directly or through mirror links to the WWW sites of the ISGI Collaborating Institutes (GFZ Potsdam, Germany; WDC-C2 for Geomagnetism, Kyoto, Japan; Observatori de l'Ebre, Roquetes, Spain).

The information and data series available at the ISGI WWW homepage are:

- o information on ISGI;
- o information on indices derivation and availability;
- o provisional and definitive values of AU, AE, AL, aa (Kpa, aa in Kp units), am (Kpm, am in Kp units), Kp, and Dst indices as monthly tables or ASCII files (hourly values for AU, AE, AL, and Dst; 3-hour values for the K-derived indices);
- o definitive list of ssc;
- o quick-look, provisional, and definitive values of K-derived longitude sector activity indices
- o quick-look values of aa (Kpa) and am (Kpm) indices, for the current month and the two previous ones;
- o musical diagrams (as postscript files) for aa and am indices;
- o ISGI Monthly Bulletins for the current year and the two previous ones;
- o selected papers about new advances in indices derivation;
- o softwares for computer derivation of K indices.
