Schematic view of GPS ionosphere sounding in DLR/IKN Neustrelitz

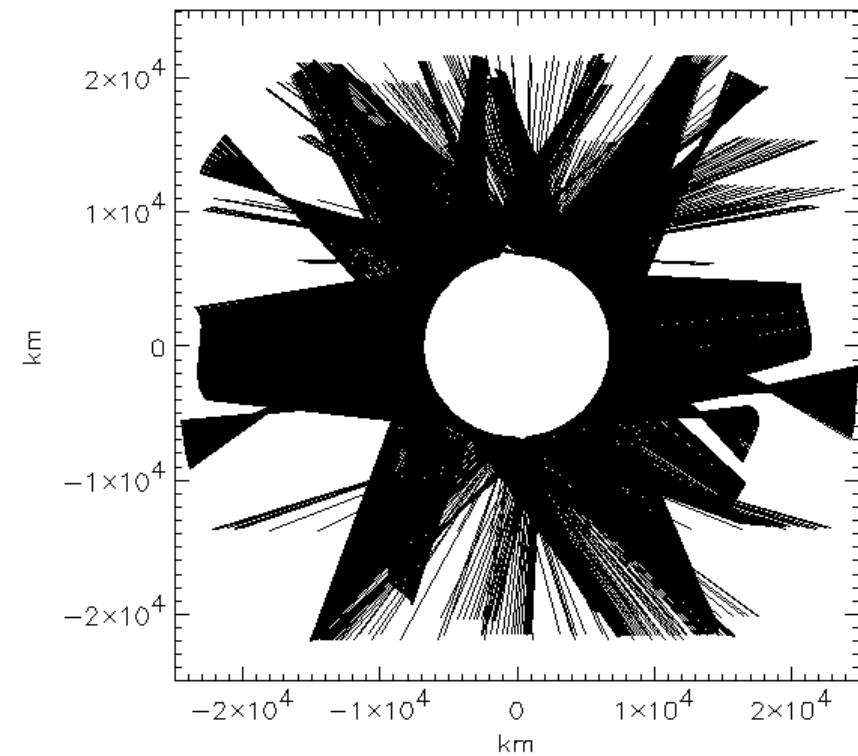

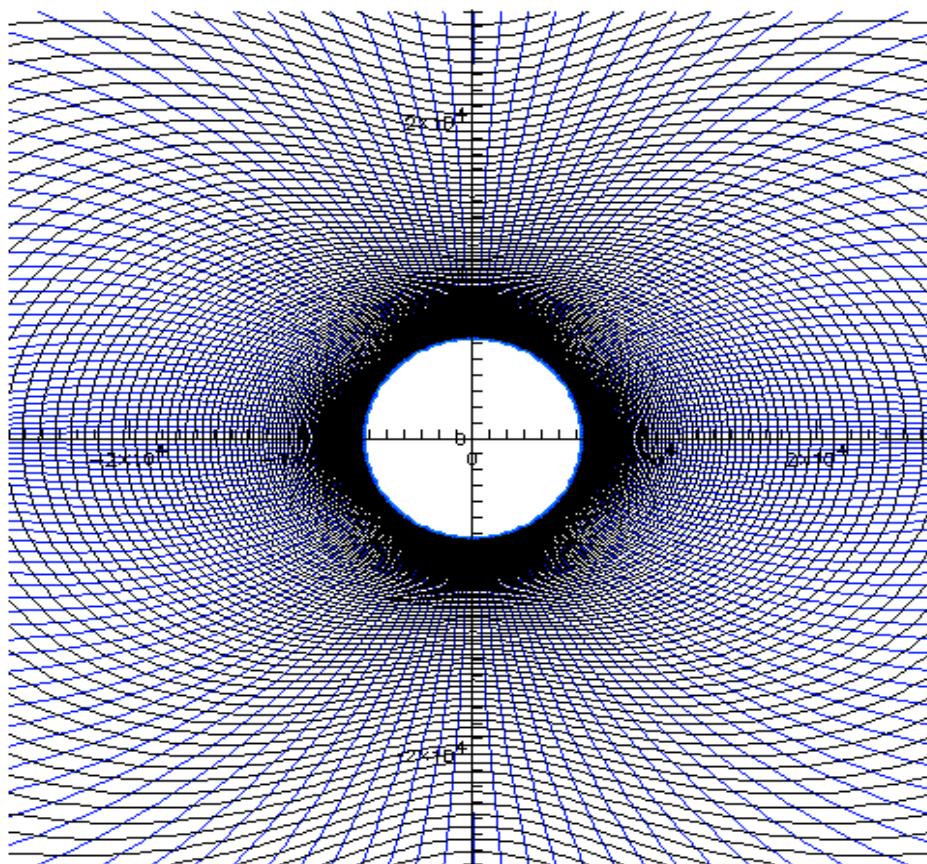

Processing Scheme Topside Ionosphere / Plasmasphere

Topside Ionosphere/Plasmasphere Data Assimilation Voxel Structure

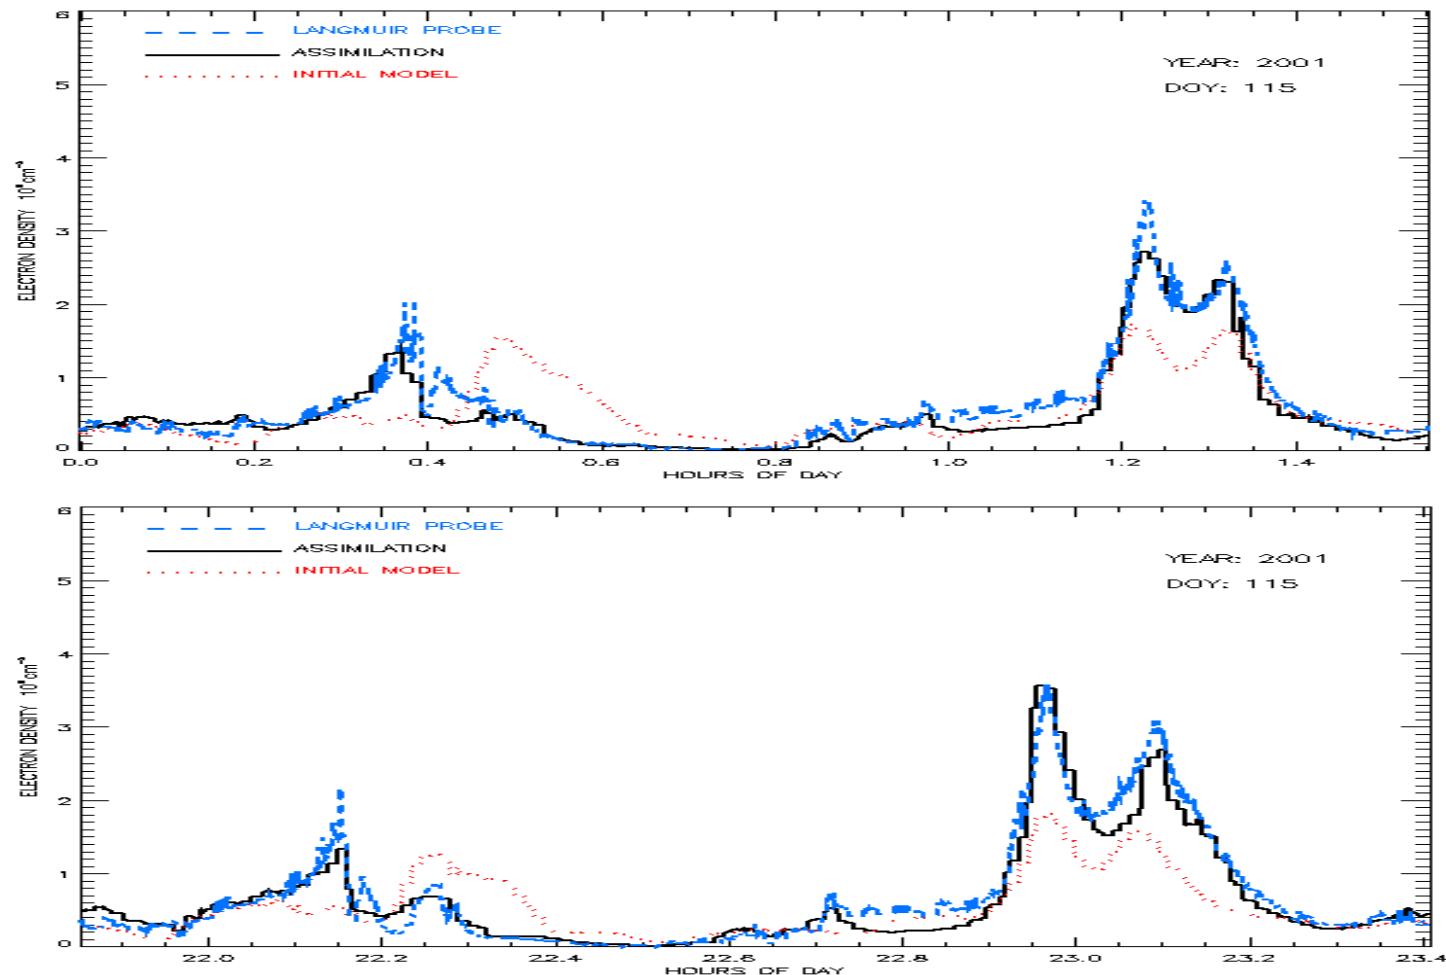

Voxel structure for data assimilation and 2D projection of a typical link distribution obtained after a full CHAMP revolution

LINK_NR: 3331
YEAR: 2001 DOY: 221 HOUR: 21 MIN: 56 DURATION: 93 min

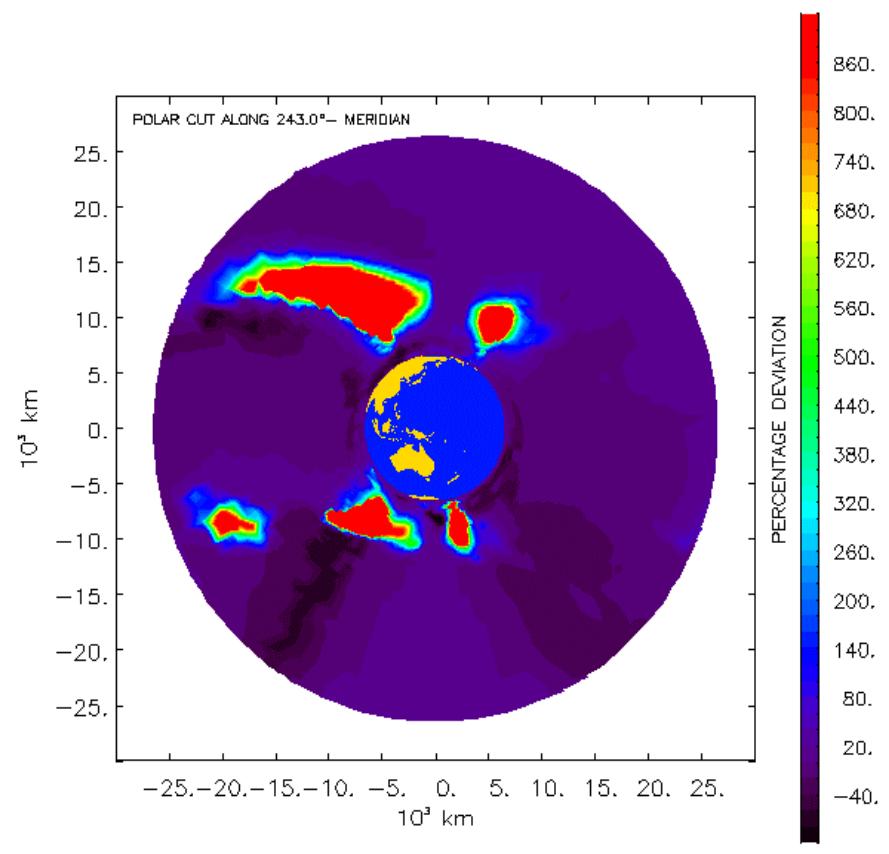

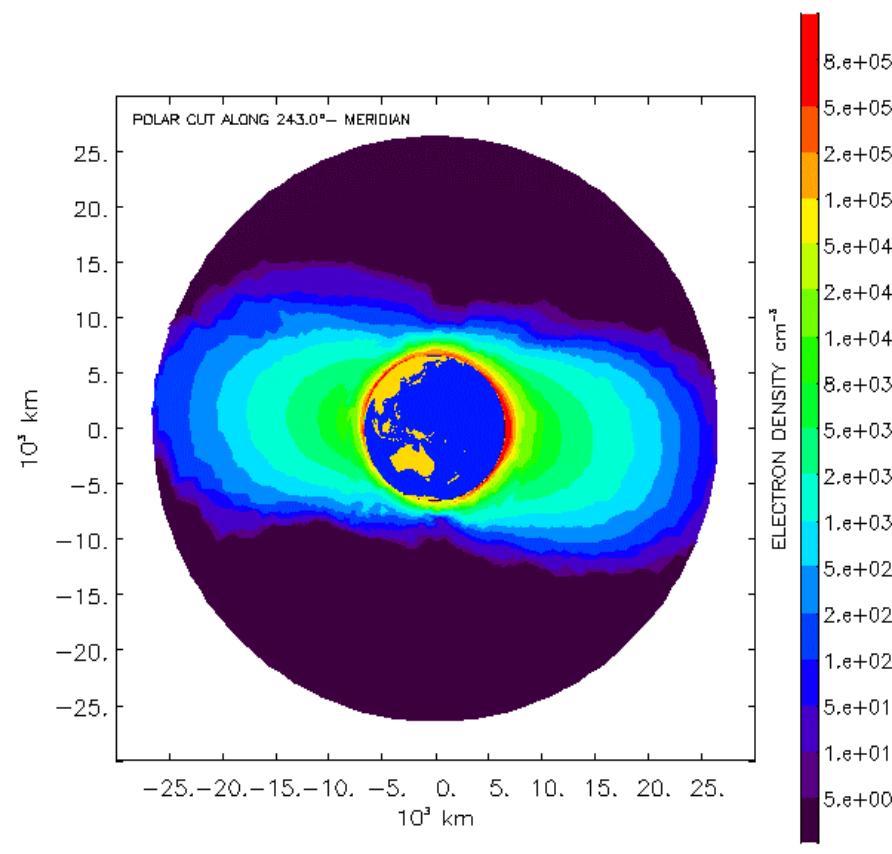

Validation using Langmuir Probe Measurements

Comparison of assimilation results and Langmuir Probe measurements for selected CHAMP revolutions

Assimilation Results

Resulting electron density distribution after assimilation of topside GPS measurements obtained during a full CHAMP revolution and relative deviation from initial model (PIM)

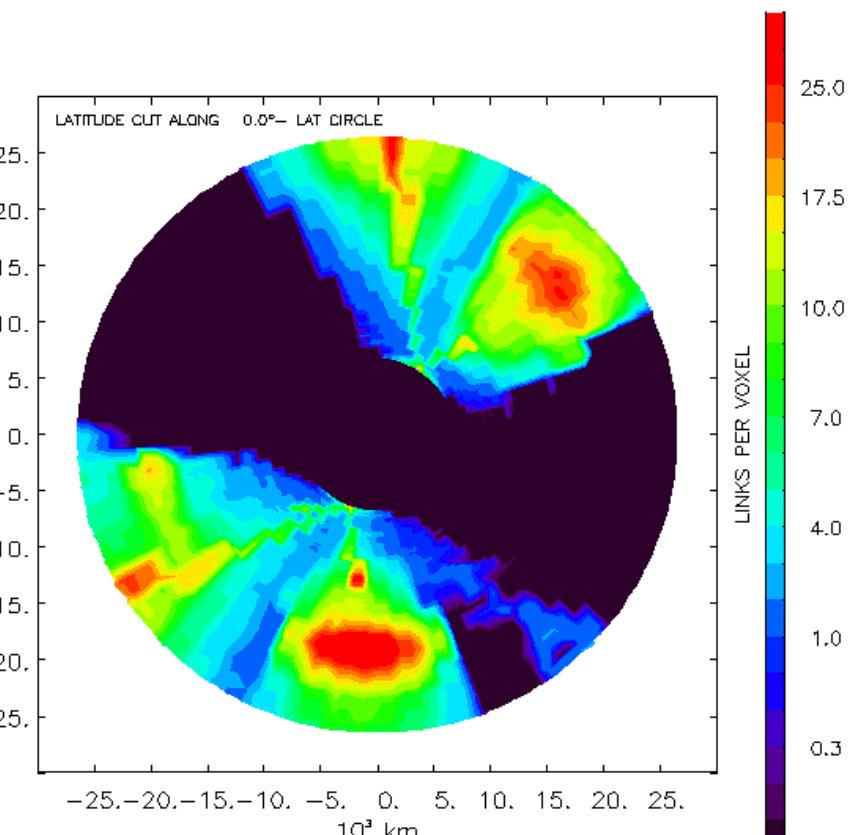

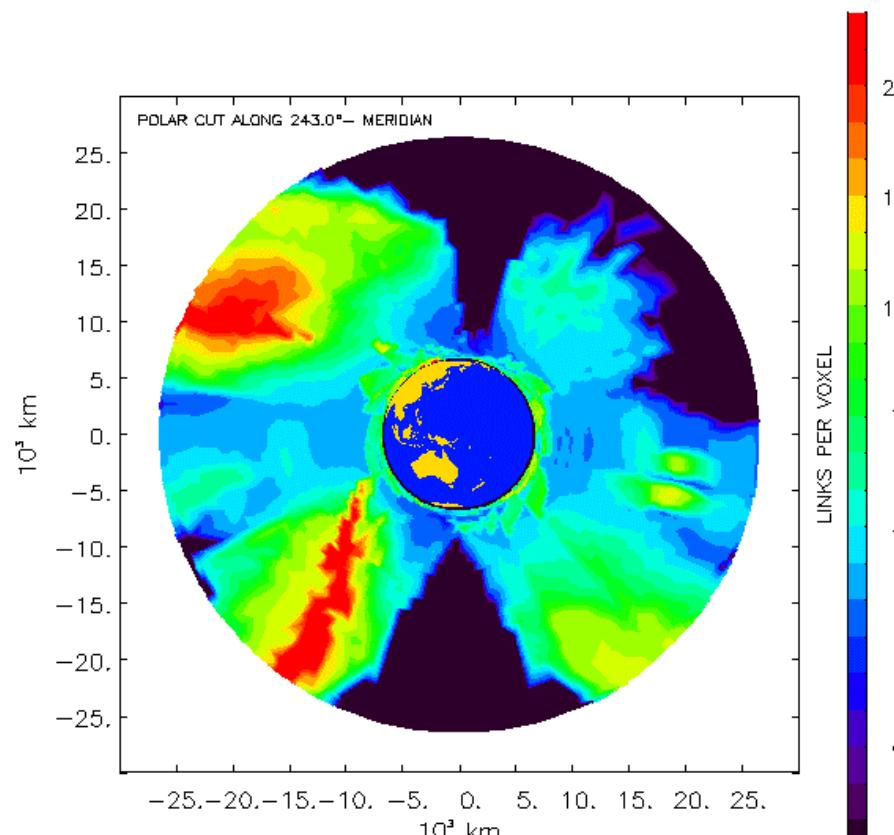

ASSIMILATION BEGIN TIME: YEAR: 2001 DOY: 221 HOUR: 21 MIN: 56 DURATION: 93 minutes

ASSIMILATION BEGIN TIME: YEAR: 2001 DOY: 221 HOUR: 21 MIN: 56 DURATION: 93 minutes

Assimilation / Data Coverage

Data coverage (number of link related TEC measurements influencing the assimilation result of a selected voxel) for a selected assimilation example

Validation using Langmuir Probe Measurements

Scatter plots of assimilation results versus Langmuir Probe and initial model (PIM) versus Langmuir Probe for 2001, days 113 - 118
