

Solar Origin of Interplanetary disturbances observed in the vicinity of the Earth

N. Vilmer, M. Pick, R. Schwenn, P. Ballatore, J. P. Villain

40 IP disturbances : WIND (B, Wind)

- 27 ICMEs : 21 MC, 2 Ejecta, 4 flux ropes
- 13 Interplanetary shocks

36/40 associated with CMEs (LASCO, EIT, NRH)

- Propagation of disturbances
- Characteristics of CMEs (size, location.)

Solar origin of CMEs, Imaging Ha, radio, EUV

- 32 /36 CMEs: **22** associated with **Flares** (AR), 10 with Filament ejections
